SOFTWARE

The background of the slide is a collage of various images related to industry and technology. It includes a green circuit board with white circles, a glowing industrial structure, a person in a control room, a person in a lab coat working with equipment, and a 3D wireframe model of a complex industrial plant.

The Virtual Process Overview and Applications

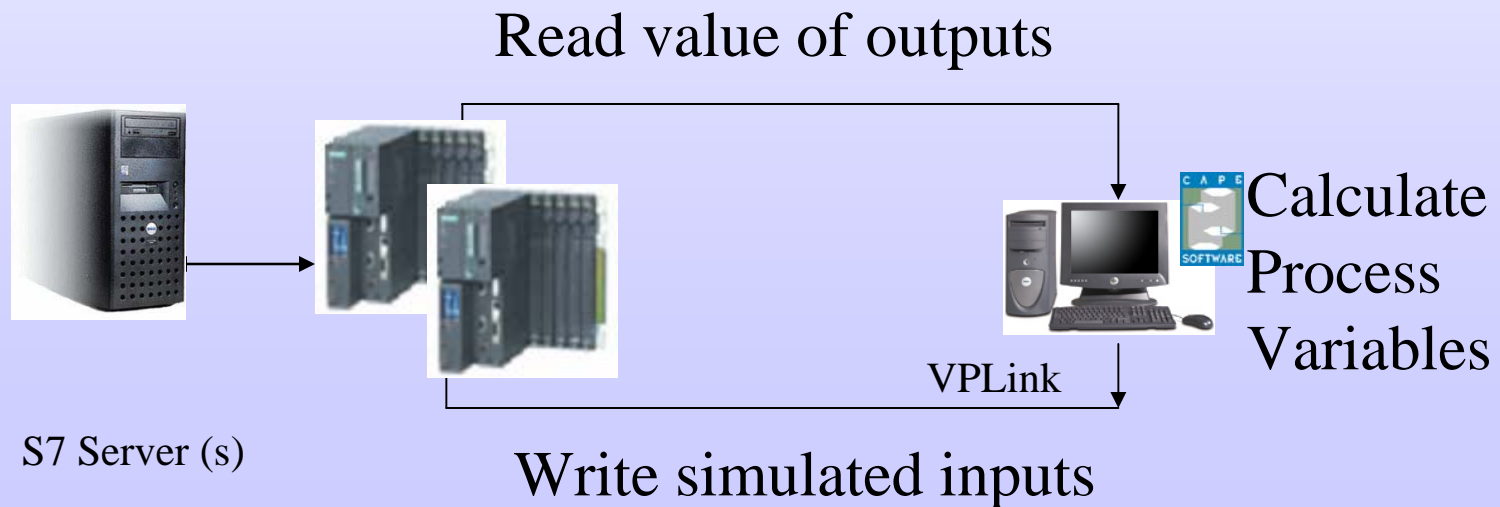

Cape Software Inc.

Houston TX

Virtual Process Overview

- Windows based interface: intuitive
- No Changes to Logic programs: non-invasive
- I/O board Hardware not required (cost advantage)

Some of our customers...

BASF – several plants across several sites W/W

TOTAL–Netherlands

Eastman – several systems within Kingsport, TN

Air Products & Chemicals – several systems W/W

Conoco Phillips –San Francisco,CA

Chevron Texaco – Several Sites Licenses

Phillips Refining – Several Sites Licenses

Iron Ore Company – Labrador City ,CA

BP – several licenses at several sites

Shell Deepwater / Shell Chemicals,UK

Eli Lilly – Corporate licensing

Genentech – several licenses at different sites

General Mills – W/W licensing

Murphy Oil - Mereaux, LA

Supported Systems

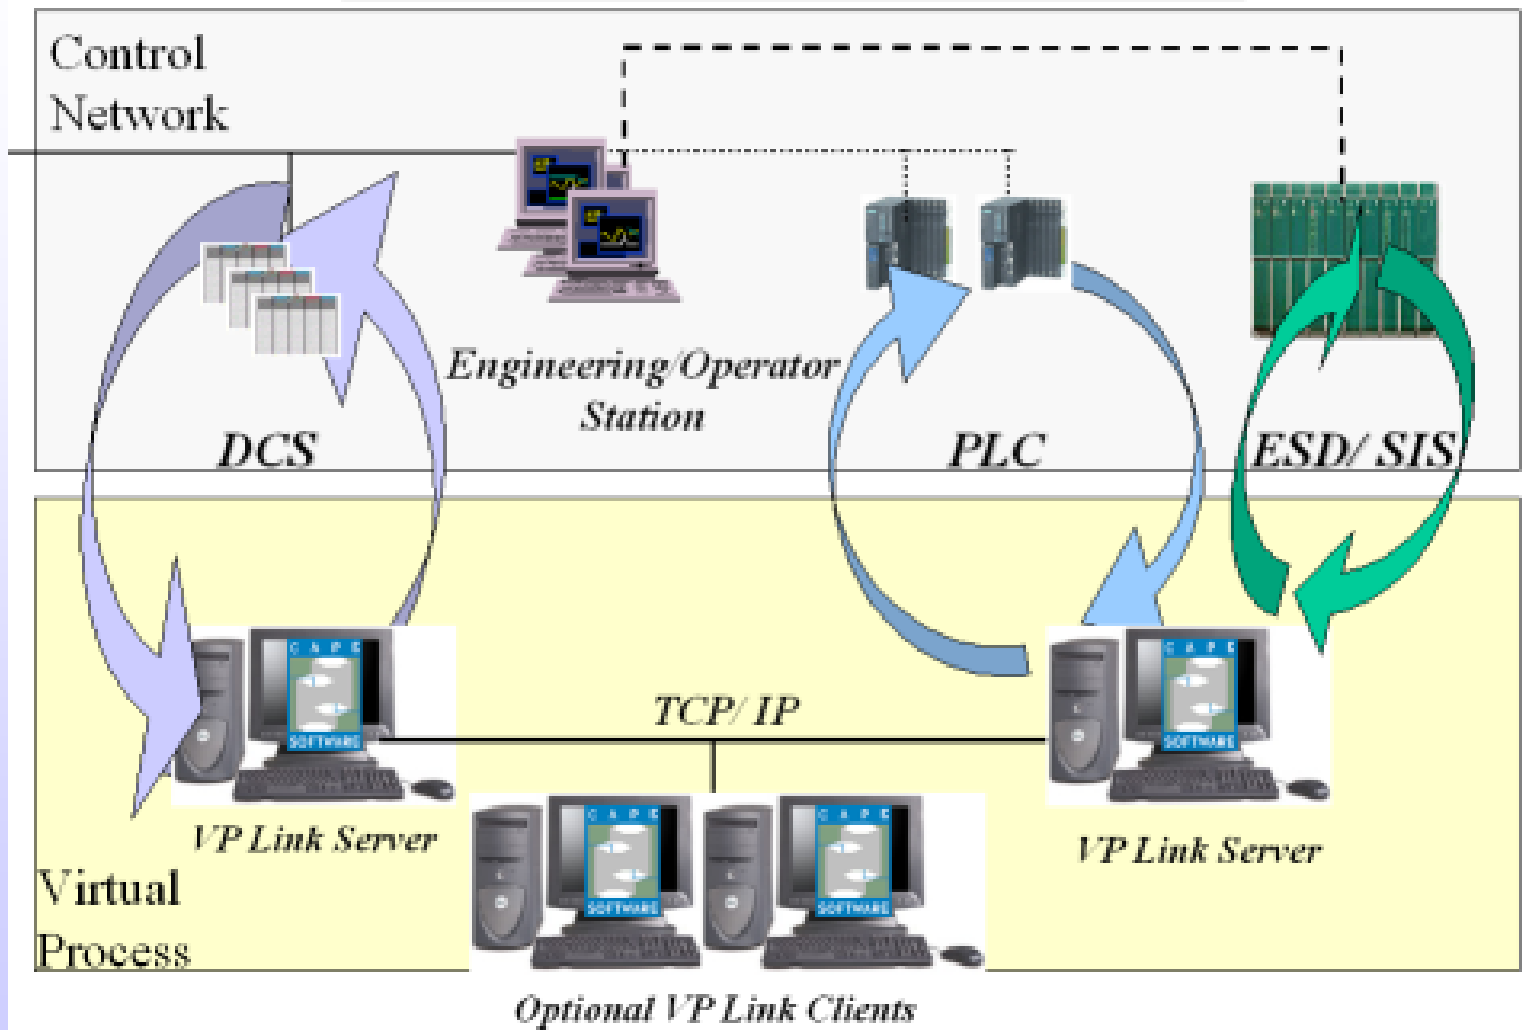

- Siemens APACS, PCS7, S7
- Honeywell Experion PKS TDC,TPS , FSC
- ABB 800 xA,Industrial IT
- Siemens APACS, PCS7, S7
- Honeywell Experion PKS TDC,TPS , FSC
- Honeywell Plantscape / Rockwell ProcessLogix
- Triconex:Tricon/Trident
- GE Fanuc series 90
- A-B PLC5/SLC500,CLX, Modicon,Siemens-Ti 505
- Foxboro I/A,Archestra
- Siemens APACS, PCS7, S7
- Yokogawa CS3000/R3/ ProSafe
- Etc...

SOFTWARE

VP LINK 3.0 Sample Network

Control Network Systems are solving the logic, responding to simulated VP Link inputs

Different Architectures for different Applications

Integrated Training Setup

Trainees operate different units, interacting with each other

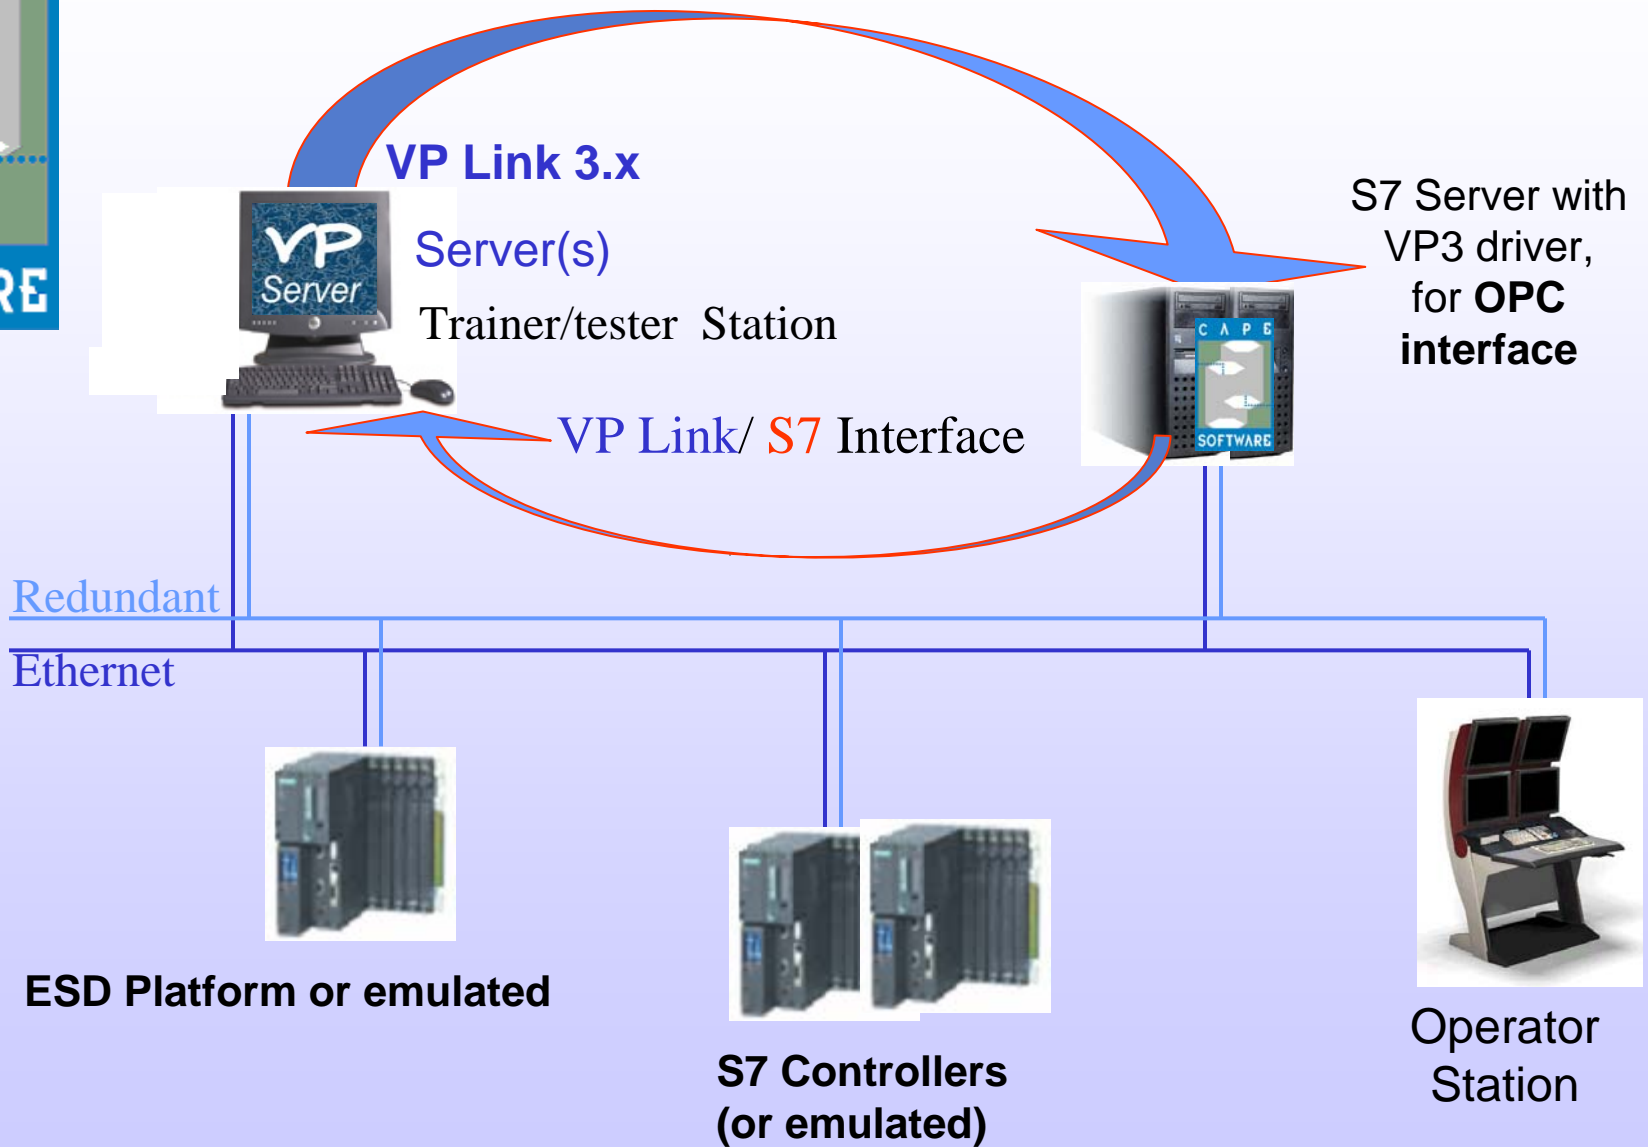

Parallel Training Setup

Trainees operate identical units, in parallel

Virtual Process : Siemens S7 Systems

5 steps to simulation with S7 Platform

- Extract the I/O image, using built-in platform specific tools
- Import the image (and HMI) in VP Link
- Model the process, using loop templates, algorithms and CalcBlock
- Write training/failure scenarios
- Connect to Control System via OPC over Ethernet

VP Link for Siemens S7 : Specifics

- Automated Extraction utility for *easy model maintenance (less than a minute to extract full I/O image)*
- HMI Graphics Import in Toolbook for realistic trainer interface
- Fast *OPC over Ethernet* Interface

Does the type of process matter ?

- VP Link is a proven solution for :
 - Batch (recipe / state control based strategy)
 - Semi-continuous
 - Continuous
- How ?
 - VP Link model is I/O based
 - Hence isolated from control strategy

VP Link Applications

I - Logic Validation

Impact of change during a project development cycle

Or why early testing is better...

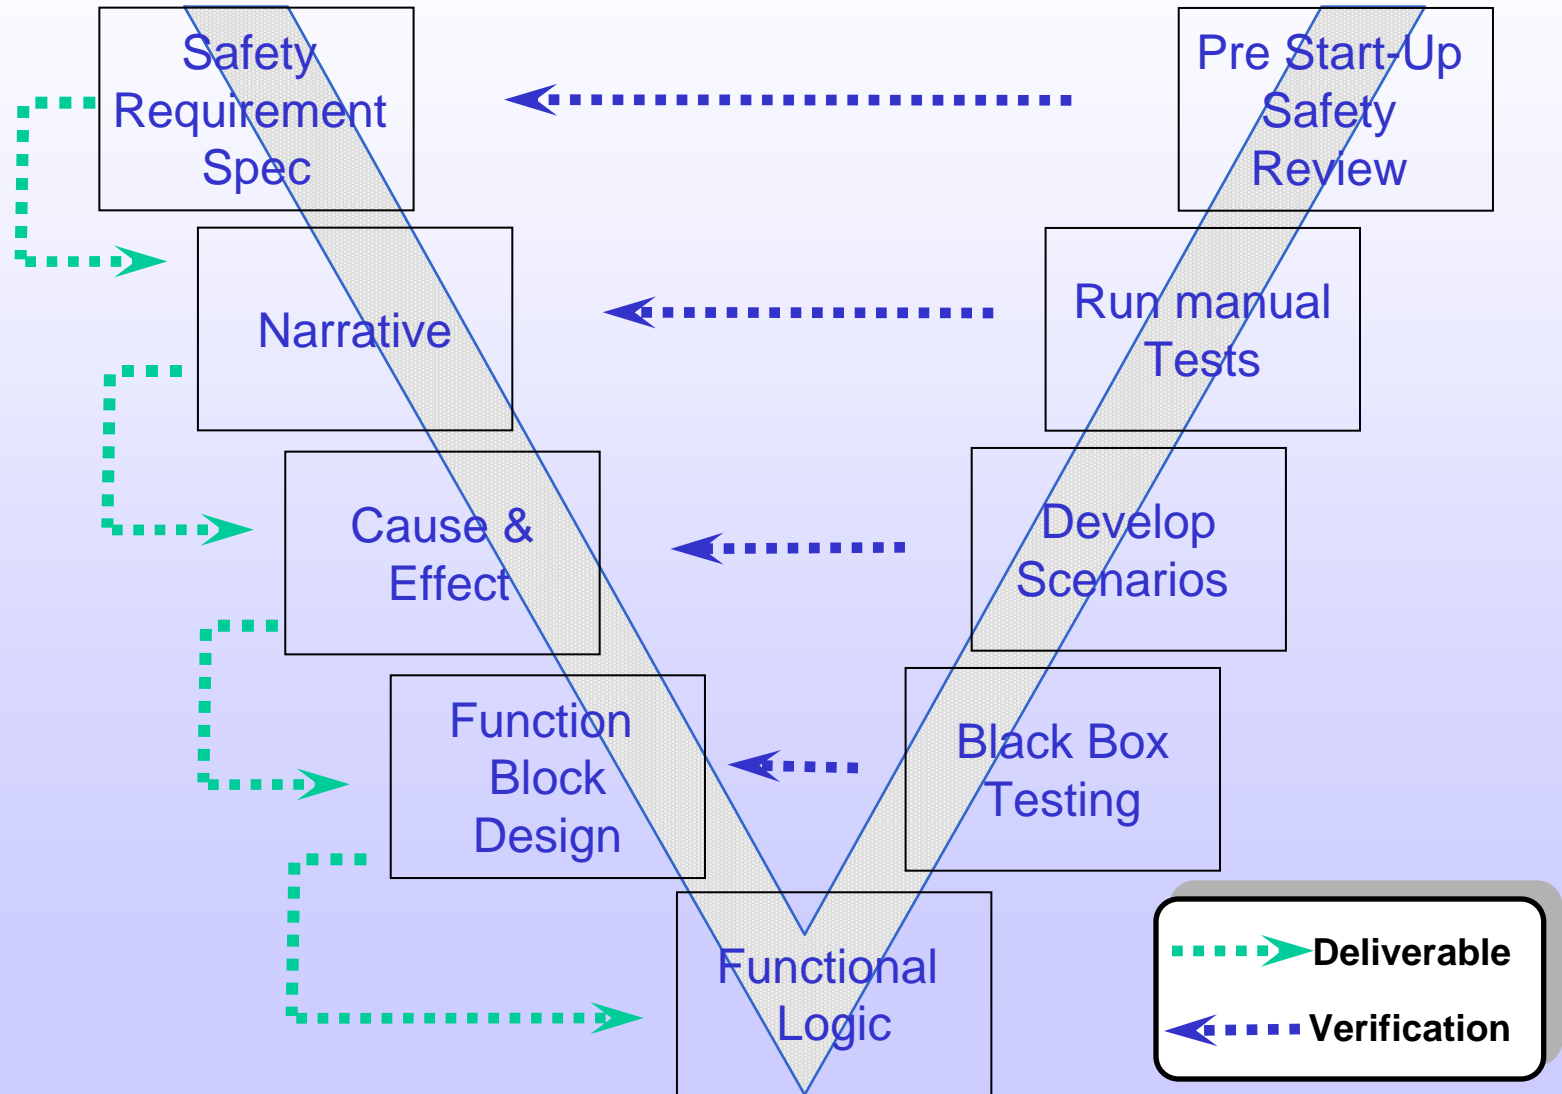

I - Logic Validation

- VP Link Allows:
 - Graphics verification
 - Logic checkout at I/O / block / module / system level
 - Interlock schedule approval
 - Integrated Testing :**Mapping** to DCS and interaction between DCS/PLC logic (gateway points tests)
- How ?
 - Automates repetitive testing task (ie resets etc...)
 - Facilitates FAT with customized graphics
 - Collaborative testing framework thru distributed architecture
- Thoroughly debug prior to online download, ie, **Management of Change** and periodical testing
- **Test Compiler complies with IEC61508/61511**

V-Approach methodology: application to validation

VP Link Applications

II- Operator Training Simulator
(OTS)

II-Operator Training

- **Familiarize** staff with HMI, Overlays, Navigation, Alarm Pages, Trend Displays
- **Exercise Startup / Shutdown** Procedures
- **Test Emergency** Responses to Faults / **Malfunctions / Upsets** (Real or Instrumentation)
- Refresher Training or Re-certification
- **Track** trainee's **proficiency** (**Scoring Engine**)
- **Knowledge Transfer** Tool

Operator Training System (OTS) using VP Link

- *Real control program* is used, in same field controllers for realistic control response
- Trainees operate the virtual plant using the real *field consoles, graphics and keyboards*
- *ESD* (Emergency **S**hutdown **D**evice) is easily integrated in the process model and OTS
- *HMI graphics are imported* in VP Link to offer a intuitive trainer interface
- *High Quality* process modeling tools, simulating the most complex chemical processes
- *Experienced* simulation staff in the *chemicals & petrochemical industry*

What kind of process simulation do I need ?

- **Process simulation Fidelity**
- **Applications of process simulation**

Cost Analysis of process model fidelity

- ~ 2,000 I/O
- Oil Refining units

Maximize your ROI with VP Link

- $ROI = (Gains - Investment) / Investment$
- Minimize your operating costs & investment:
 - Fixed investment for simulation based on **I/O count**
 - **Low maintenance** cost (non-invasive, I/O based)
- Maximize your gain:
 - **Gains** calculated over **process lifecycle**
 - Highly **variable gains** depending on flexible implementation **timing** (if used for **validation AND OTS**) in terms of schedule AND software quality

Conclusion

- VP Link solves simulation needs from *simple to sophisticated*, rigorous modeling.
- OTS node can be used as an engineering Test Bed system, for *preventive / periodical logic validation*
- *Unattended Real Time* trainee performance logs
- Modeling environment is *flexible, easy to learn and maintain*
- Available *New Version Service* keeps VP Link components up to date, with *free* technical support
- *Cost Effective* simulation package for *OTS*, using Off the Shelf components for process model and control or emulated control
- *Cross platform* functionalities makes VP Link an *evolutionary investment*
